

3D Paper House

Step One: Colour in the illustrated sides of the house.

Step Two: Carefully **cut** along all **solid** lines around the edge of the house, don't forget to cut along the solid lines between flaps A, B, D, E and the house.

Step Three: **Fold** along all **dotted** lines.

Step Four: Fold up the two sides of the house, so that the chimney is pointing up. Secure in place by sliding flap A and flap B together, like they are holding hands, to create a solid join.

Step Five: Apply glue to flaps A, B, D and E. Fold the front of the house up and press it firmly against flaps D and E to secure it. Repeat with the back of the house and secure against flaps A and B.

Step Six: Apply glue to the underside of flap C. Fold inside house and over D and E flaps.

Step Seven: Apply glue to the top of all F flaps.

Step Eight: Apply glue to the rounded section of flaps G and H, and secure to the underside of the roof.

Step Nine: Apply glue to flap I, then fold the roof up and over. Secure roof to F flaps, then tuck flap I under the roof and adhere to flap C.

Step Nine: Voila!
